

JOSE CARMEN AGUILAR ZETINA
IT Consultant

Phone: Home 011(5255) 5598-4999, cel 011(5255) 04455 1119-4233 Office: 011(5255) 5661-6369
Email: fsoluciones_ja@hotmail.com cosmovis@yahoo.com cosmovis@hotmail.com

Summary of Qualifications

José has over 18 years of IT experience, along them has developed programs for industries such as: multimedia, social security, banking and consulting. He have developed control systems for car maintenance, cross-reference sales at department stores, programs to measure food supply needs of hospitals and children care departments using nutritional factors, Credit, Accounting, Payroll and Invoice systems. He has trained staff and given them technical advice for choosing and buying the best new information technologies during the last 10 years. He has written COBOL programs for personal computers, mini-computers and mainframes, also he has experience in analysis, development and deployment of Client Server Solutions using Microsoft SQL Server, Oracle, Informix, Access and Microsoft Visual Basic. He has Written Microsoft Visual Basic programs using Crystal Reports and Sheridan Data Widget controls. While he was working for all of these companies, he was able to find the most suitable solution for technical problems they had showed to him. Currently he is working for Finanzas y Soluciones, S.C.; which is a Consultant Company and he had published his own homepage: <http://www.cienciaybelleza.com>, which you are invited to visist.

FINANZAS Y SOLUCIONES, S.C., Mexico, D.F.

Jul 03 – To Date

Position **Systems Engineer**

Project Name: **Sistema de Emisiones, Sistema de Siefores, Technical Support**

Environment: **Microsoft Visual Basic, Access, SQL Server v.7 and v.2000**

Description: The Sistema de Emisiones was intended to provide customer support by giving them the ability to download financial instruments information. Core Database is shared with other company products to give full financial instruments control to customers.

The Sistema de Siefores is an accountability system that manage financial founds and is being designed to migrate legacy systems that still are working on clipper; for instance one of them manages financial retirement founds and the other is to manage any kind of financial founds, so, the new system will work on Microsoft SQL Server and Ms Access 2000, beside all of them will be part of the new core technology for managing financial founds.

Technical advice is given to choose new technology either on software or hardware buyings; for instance, after evaluation, we choose Component One: “Doc to Help” as the program we use to write user documentation and help files.

- Responsibilities:**
- Microsoft Visual Basic and Access Programming as Front-End against SQL Server 7, 2000 as Back-End.
 - Gave Staff’s technical support
 - Troubleshooting personal computers and network support malfunctions.
 - Wrote Windows help files for the 3 Portafolios Program Versions.
 - Test and fix uploading programs for the Call Money System moving data from MSSQL 7 to MSSQL2000 and from Clipper to MSSQLServer 2000
 - Quallity assurance and review of the programs for uploading legacy systems to new technologies
 - Backup and restore any SQLServer Databases in order to test the new accountability system
 - Setup Windows 2003 Server and Ms SQL Sever 2000 and manage users
 - Design new programs for fast information transfer using SQL-DMO, BCP, DTS
 - Setup and support Symantec Internet Client Security for each workstation as well as Lavasfot-SE from Ad-Aware in order to prevent virus attacks
 - Setup PCAnywhere on the LAN Server

FREELANCE, Mexico, D.F.

Jul 02 – Jul 03
